

INTRODUCING THE GLISSNER™

CleanPhone™

Meet the world's first truly touchless sanitizer that kills 99.99% of viruses and bacteria on your phone in 20 seconds without using any chemicals.

- 1** Phone is inserted at the top of CleanPhone™.
- 2** Phone automatically descends into the sanitation chamber.
- 3** Phone reappears fully sanitized in 20 seconds. Remove with clean hands.

LABORATORY TESTED

Testing has been performed in a 3rd party European laboratory with verifiable outcomes. All units are delivered with lab results as part of the Operating Instructions Manual.

FITS ANYWHERE

Available with a deck stand, floor stand or wall mount, the CleanPhone™ requires only a standard AC wall outlet to operate.

COMPLETELY SAFE

Our ISO 4892-1 compliant device never uses any chemicals in its sanitation process, and is safer for your phone than disinfectant wipes.

TRUSTED TECHNOLOGY

Our purpose-built UV-C technology has been used for surface, air and water disinfection in medical facilities, factories, and food processing plants for decades with stellar outcomes.

STOP CROSS-CONTAMINATION

We carefully crafted our patent-pending CleanPhone™ to not require any button pressing, lid lifting, or lever pulling. We understand that in today's day and age, people expect no-touch solutions.
